

Ballygawley Early Years Playgroup

Sickness Exclusion Policy

This policy sets out the exclusion periods from Playgroup for children who are ill, including if they are infectious. Ballygawley Early Years Playgroup takes into consideration guidance from the Public Health Agency with regards to exclusion periods for illnesses and infection control, as well as the needs of the children and staff.

Procedures

Children who are ill

Prior to the commencement of the Playgroup year, all children will complete the Registration Form which gives details of their Doctor's name and Doctor's Contact details. The registration form will also include details of the child's relevant medical history.

It is at the Leader's discretion whether or not to allow a child into Playgroup if they are showing signs of illness, even if there is no exclusion period or if this is after any exclusion period has passed, or if a doctor has stated that they are not infectious. The Leader will need to take into account the demeanour of the child and whether they are well enough to participate in Playgroup activities. They must also consider whether allowing a sick child in Playgroup would affect the staff to child ratios, as children who are unwell may require continual one to one attention. If we allow a child showing signs of illness or who has recently recovered from an illness into Playgroup, then we will monitor them regularly and will contact parents/guardians to ask that they are collected if they become unwell again.

Illness Outbreaks

If there is an outbreak of an illness in Playgroup then the Leader will consult with the local Public Health Agency office for advice. We may decide to exclude children in order to control an outbreak where this is not listed in our normal exclusion policy.

Ballygawley Early Years Playgroup

Infectious Illness Reporting

If a child has an illness we would request that the parents/guardians contact the Playgroup as soon as possible so we can communicate this to all staff and parents/guardians, as well as the Public Health Agency if it is a notifiable disease. This is particularly important in case a child has come into contact with a pregnant staff member or parent/guardian.

We provide a list of illness/infections but please note this list is not exhaustive but contains the most common exclusions.* = Notifiable diseases

Illness/Infection	Exclusion Period for children
Athlete's Foot	None
Chicken Pox*	Until all vesicles have crusted over
Cold Sores (Herpes simplex)	None
